# MAGNALINE AUSTRALIA

America's revolutionary award-winning bi-fold door system  
has arrived in Australia

# KEY FEATURES

The Magnaline™ Door is loaded with unique special features that give you a state-of-the-art door system that has been recognized by industry leading publications as the "Most Innovative".

## Concealed Hinges

Rather than traditional folding doors where a series of panels connected to each other with hinges, the Magnaline™ Door is designed with concealed hinges and pivot points. This allows the panels to move independently of each other, thus providing a pleasant aesthetic view with an enhanced ease of operation.

## Bottom Track Supported

Rather than hanging from the header, our panels ride on the bottom track, reducing the cost and weight of special structural support on the top header, because all the weight rests on the bottom track for the Magnaline™ System where it is best supported!

## Independent Moving Panels

With the hinge-less design, all panels are moved independently, you can have total control of the opening position. Depending on the weather and the time of day, you can control the opening and airflow.

## Clean Design

Since all hinges/pivot points are concealed, the Magnaline™ Door provides more pleasing aesthetics and architectural sight-lines.

## Unlimited Width

The Magnaline™ Door will meet your needs with unlimited width options. If you can build the opening, we can build the door!

## Multi-Point Locks

The swing door panels come equipped with a deadbolt and multi-point lock that locks into the neighboring panel to ensure security. Panels cannot be lifted out of the track and the interlocking grooves between the panels means you can relax knowing you are secured with the Magnaline™ Door.

## Durability

The Magnaline™ Door system is available in both high quality uPVC and extruded aluminum. The design and construction allows for additional reinforcement on all four sides of each sash to ensure your door is strong enough to endure years of use.

## Easy Open Panels

Individual panels are easy to move since there are no hinges, binding, or sagging. All panels glide with a smooth and easy functionality along the bottom track.

## Interlocking Panel

Interlocking "tongue and groove" panels provide for security and performance against the elements without the need for traditional locking mechanisms.

## 4-in-1 System

The Magnaline™ Door combines all the opening possibilities into one system. It contains features like fixed light, sliding systems, swing panels and folding-n-stack operation.

## Slide and Pivot Operation

Utilizing our innovative Magnaline™ System, the door panels slide-and-pivot independently for easier operation.

## Versatile Design

Designed with versatility in mind, the Magnaline™ Door is the perfect door for home, office or restaurant. With its user friendly and innovative design, the Magnaline™ Door is a fantastic way to accentuate your outdoor entertaining space.
